Furniture and Custom Furnishings – Made to Your Wishes

I want to help my clients set up their homes with individuality: A home is a place where we meet our family and friends, where we live, and where we want to feel safe and comfortable. As a German master carpenter and furniture designer, I am beside you from the beginning of the process all the way to the end result. I provide expert, individual advice on the design of your interior space based on your needs and your wishes; I personally manufacture the pieces; and I professionally install your furniture. Quality, design and functionality are combined for your custom-made kitchen, bathroom, bedroom, living room, library, or private office. Whether you prefer furniture created with a special type of high-quality wood, glass, or even metal – or you need furniture that supports the latest electronics and technology – your furniture is designed, made, and installed to fit you, uniquely, and make your house a ‚home‘.

My Services and Support for You:

- ✓ personal consultation
- ✓ complete planning
- ✓ individual design
- ✓ professional installation

*“The mastercraft of carpentry has a long tradition in Germany and is also the basis of quality in modern décor today.”*

Materials I work with and design for:

- ✓ wood
- ✓ glass
- ✓ metal
- ✓ electronics and technology

Master Carpenter Oliver Gorr

The title of Master Carpenter is the highest qualification available in the carpentry trade in Germany.

# Your Kitchen

It is the centerpiece of family life – and the secret center of all parties. Here is the place you may sit with the best of friends as you cook, talk, and laugh. Whether modern, classic or retro – the choices in style are diverse. The kitchen also needs to be practical: the equipment needs to be ready to cook and bake – and it also needs to be prepared for splashes of oil, sharp knives that might encounter a surface, or a hot baking pan that needs a place to cool down. There must be enough room for pots and pans, as well as cooking utensils – but they must be quickly accessible. What your kitchen design needs depends on each individual. That's why it's crucial to determine what are the most important elements of your own dream kitchen.

*My tip for kitchen design:*

*“Think about both aesthetics and functionality when it comes to kitchen design. The kitchen must be pleasing to the eye and practical – in equal amounts, when possible. Daily cooking needs are the cornerstone for the perfect kitchen plan.”*

## Cooking in Control

# Your Bathroom

Getting ready in the morning – getting relaxed in the evening: A great bathroom needs to have order, harmony and a feel-good style. A hair dryer, shaving cream, face cream and towels can be stowed away - but they should be easily at hand, with sufficient storage space. Practical cupboards, shelves and vanities in a modern design guarantee more organization. Whether it's a large bathroom or small, there is an optimal design that still feels relaxing. Add high-quality materials, and your bathroom will feel like an oasis of well-being.

*Tips for your bathroom oasis:*

*“Create enough storage space – it can be created around any obstacles. For example, water connection pipes can be enclosed inside drawers. Use different internal dividers for cosmetics, toiletries or a hairdryer, so that you always have perfect access to each of them. Of particular importance is the highest-quality, waterproof sealing materials. Using the highest quality wood, stone, metal, and electrical materials will create a safe, secure and durable bathroom.”*

## Space for Daily Relaxation and Comfort

# Your Living Room

*For a comfortable living experience:*

*“The living room is now actually a multi-media room – but technical connections and cables are hidden. A good living room design keeps in mind the ‘invisible electronics’ that are installed and operated within the living room and even the living room furniture: cable connections, loudspeakers, remote controls and integrated lighting solutions.”*

Whether it's a having game night or watching a television detective show, sharing red wine with friends or reading a book on the sofa – the living room is full of life. Here's the space where everyone can relax, enjoy each other's company, or just have fun. This means that the living room must be comfortable and durable for any occasion. Must-haves are a sofa with a matching table, dressers for small items, and chic cabinets for glasses and dishes. There is a perfect usage of wood, glass and metal for everyone's tastes. Finally, integrated lighting ensures a pleasant mood. Treat yourself to the best designs for your lifestyle – with your own pleasure in mind.

## Daily Comfort in Your Home

# Your Bedroom

### *Tips for more comfort in the bedroom:*

*“Storage space can be created even in small spaces. Your clothing should be easily accessible. Sometimes a clothing ‘elevator’ or pull-down shelf system can be designed, made up of more basic to more elaborate design systems; this will allow a maximum use of space. In a bedroom that is located on roof-topped floors, like penthouse and attics areas (“dachgeschoss” areas), a tailored design is a must.”*

Here’s the space to let yourself relax: Enjoy the night or a nap – the optimum design will transform your bedroom into an ideal place to rest. Matching furniture will provide the perfect atmosphere for nice dreams. In the morning, you’ll have an orderly space to dress, ensuring a good start to the day. A bedroom often holds many things to be stored, but the room itself needs to remain clear. A uniform design for your bed, bedside tables, closets and dressers gives a peaceful atmosphere to the day – and new strength. How would you like your day to start in a warm and cozy, organized space of all your own?

## An Organized Start – and Finish – to Your Day

# Your Library Room

Sorted alphabetically or by genre – in a great library, book lovers must be able to easily find their favorite works. One option is floor-to-ceiling bookshelves: this design gives a lot of room to line up printed treasures – not only is this practical, but it is a real highlight in a home. However, these shelves will have to withstand very heavy loads: whether it's a collection of Shakespeare's plays or illustrated science books, paper weighs a lot. Tall wooden bookshelves can carry far more weight than many metal versions. Many shelves hold not only books but also photos and other collectibles. A cozy reading space in the library will invite you and your guests to browse.

*For more joy in your own library:*

*“Structure and stability are the key factors here. The furniture’s design, however, should still appear light. To use the existing space optimally, I combine lighting solutions, filing cabinets or even individually-designed special shelves. Doors and drawers provide additional order.”*

## Storage Space for Your Books and Collections

# Your Home Office

*My tip for a pleasant working space:*

*“The top priority here is a functional design: technical and cable connections have to be as easily accessible – and invisible – as possible. In this room, papers and files can be safely stored yet also accessed quickly. Your desk should be designed with adjustable height options for your comfort and health.”*

In an office, concentration is needed, so everything must be optimally designed smoothly. With the right design, everything is in the right place. Whether you are there for a few hours or most of the day, the desk area is the focal point of the room – and your needs. Not everyone has the same needs, however. When designing your workspace, important questions arise: where and how much space is needed, and what tasks and technical equipment are required regularly? A great office space will have another important feature: it should be suitable for many activities. A height-adjustable standing desk may be needed. Filing cabinets and shelves in a variety of specially-designed heights and widths will complement the workspace for organization and storage of important materials.
